

Toni Esan

London, UK

| +44 759665 7760 | oluwatoniesan@gmail.com | www.github.com/Toni9a

Combining expertise in mechanical engineering, AI implementation, and business development, I help organisations leverage emerging technologies to drive innovation and growth

EDUCATION

Cranfield University

Distinction, Msc in Applied Artificial Intelligence

Cranfield, UK

September 2025

- **Core Modules:** Data Analytics and Visualization, Deep Learning for Computer Vision, Cyber-physical systems

Aston University

1st class, Bsc in Design Engineering

Birmingham, UK

June 2021

Achievements: 1st Class in dissertation on eScooter optimisation. **Key Modules:** Systems control, Engineering Materials

EXPERIENCE

Leveret AI

Technical Officer

London, Abu Dhabi

June 24' - Present

- Collaborated with a cross functional team to refine training datasets on computer vision for dental x-ray diagnosis
- Led beta testing for NHS dental clinics gaining ~ 27% early adoption rate, gathering feedback for model iterations
- Contributed to business use-case development, merging market research with technical feasibility to shape impactfulness whilst bridging communication between engineers and end users, ensuring clear documentation.

Digital & Automation consulting

Self employed:

London, UK

December 22' - Present

- Delivered **AI-assisted web solutions and Shopify builds**, while developing **VBA scripts and automation tools** to optimise business workflows, improve efficiency, and support scalable digital operation

Santander HQ via Constellation

Events& Operations coordinator, part time

Milton Keynes, UK

Jan 24' - Present

- Launched Excel dashboards for resource tracking and coordinated AV setups, reducing spend by ~15%.
- Implemented QR code system for >300 client events, cutting registration time by ~20% & boosting experience.

GXO Logistics – John Lewis

Product Engineer (PAT Testing)

Northamptonshire, UK

Jan 23' - Nov23'

- Spearheaded PAT testing with optimized SOPs, training four new staff on safety standards and gaining exposure to IoT-driven warehouse systems.

Drain Doctor

Field engineering coordinator:

Cambridgeshire, UK

October '21 – July '22

- Optimised field routes and inventory using engineering expertise while managing phone communications and supervising teams to reduce downtime.

Beaconsfield Dental Head Office

IT Operator

London, UK

September 20' – Feb 21'

- Centralized data management by digitising patient and financial records across six practices, boosting retrieval efficiency and reducing postage needs -Whilst training 3 students on work experience on digitisation methods.

LiviaSoft Technologies

Research Assistant, Lab Innovation

Abuja, Nigeria

September '19 -April '20

- Analyzed GNSS signals in MATLAB and built radio jamming demos that secured training contracts with local telecoms. Compiled & presented Bluetooth/Zigbee reports to stakeholders for West African deployment.

RELEVANT PROJECTS

- Built an **automated geospatial data pipeline** integrating **satellite imagery**, **API-derived metadata**, and **LLM-generated narratives**, enabling **computer vision experimentation**, **data preprocessing & validation**, and **multi-modal dataset construction**, contributing to a **published research project**
- Built a **simulation and validation framework using LiDAR-derived spatial data**, enabling **data processing**, **testing protocols**, and **performance benchmarking** for crowd flow optimisation scenarios.

SKILLS

- Data & ML: Python (Pandas, NumPy, scikit-learn), PyTorch, TensorFlow; LLM prompt engineering (Claude, Gemini)
- Computer vision & Engineering: YOLO, MATLAB, Simulink, SolidWorks, Ansys, 3D printing & prototyping

LEADERSHIP & INTRESTS

-Head of House-BSAK, Abu Dhabi: Experience in resolving conflicts and leading younger students in sport.

Footy addicts, London: Built strong interpersonal skills, & time management, evidenced by successful hosting >70 games.

Interests: Building mobile apps, consumer hardware, electric vehicles, mixed reality, half marathon training, EdTech.
